INDEPENDENT AUDITOR'S REPORT

To the Shareholders of Duran Ventures Inc.

We have audited the accompanying consolidated financial statements of Duran Ventures Inc. and its subsidiaries, which comprise the consolidated statements of financial position as at December 31, 2016 and 2015, and the consolidated statements of operations and comprehensive loss, consolidated statements of accumulated other comprehensive loss, consolidated statements of changes in shareholders' equity and consolidated statements of cash flows for the years then ended, and a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with International Financial Reporting Standards and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We conducted our audits in accordance with Canadian generally accepted auditing standards. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of Duran Ventures Inc. and its subsidiaries as at December 31, 2016 and 2015, and their financial performance and cash flows for the years then ended in accordance with International Financial Reporting Standards.

Emphasis of Matter

Without qualifying our opinion, we draw attention to Note 2 in the consolidated financial statements which indicates that Duran Ventures Inc. had continuing losses during the year ended December 31, 2016 and a cumulative deficit and working capital deficiency as at December 31, 2016. These conditions along with other matters set forth in Note 2 indicate the existence of a material uncertainty that may cast significant doubt about the ability of Duran Ventures Inc. to continue as a going concern.

1. GENERAL INFORMATION

Duran Ventures Inc. ("Duran" or "the Company") is a publicly listed company originally incorporated in British Columbia and subsequently continued in Ontario under the Canada Business Corporations Act. The Company's common shares have been listed on the TSX Venture Exchange since July 4, 2007, and on the Risk Capital Segment of the Lima Stock Exchange (Segmento de Capital de Riesgo de la Bolsa de Valores de Lima) in Peru, since September 21, 2012, and trade under the symbol "DRV" on both exchanges. The Company, directly and with exploration partners, is engaged in the exploration of mineral properties in Peru. The Company's principal office is located at 40 University Avenue, Suite 603, Toronto, Ontario, Canada M5J 1T1 and substantially all of the Company's corporate and administrative expenses are incurred in Canada.

2. GOING CONCERN

The business of mining and exploring for minerals involves a high degree of risk and there can be no assurance that current exploration programs will result in profitable mining operations. The recoverability of the carrying value of exploration and evaluation assets and the Company's continued existence is dependent upon the preservation of its interest in the underlying properties, the discovery of economically recoverable reserves, the achievement of profitable operations, or the ability of the Company to raise alternative financing, if necessary, or alternatively upon the Company's ability to dispose of its interests on an advantageous basis. Changes in future conditions could require material write-downs of the carrying values. The Company's assets are subject to increases in taxes and royalties, renegotiation of contracts, expropriation, currency exchange fluctuations and political uncertainty.

Although the Company has taken steps to verify title to the properties on which it is conducting exploration and in which it has an interest, in accordance with industry standards for the current stage of exploration of such properties, these procedures do not guarantee the Company's title. Property title may be subject to government licensing registration or regulations, unregistered prior agreements, unregistered claims, aboriginal claims and non-compliance with regulatory, social and environmental requirements.

These consolidated financial statements have been prepared on a going concern basis. The going concern basis of presentation assumes that the Company will continue in operation for the foreseeable future and be able to realize its assets and discharge its liabilities and commitments in the normal course of business. In assessing whether the going concern assumption is appropriate, management takes into account all available information about the future, which is at least, but is not limited to, twelve months from the end of the reporting period. The Company also had a loss during the year ended December 31, 2016 and a cumulative deficit and working capital deficiency as at December 31, 2016. Management is aware, in making its assessment, of material uncertainties related to events or conditions that cast significant doubt upon the Company's ability to continue as a going concern. The Company's continuance as a going concern is dependent upon its ability to obtain adequate financing or to reach profitable levels of operation. It is not possible to predict whether financing efforts will be successful or if the Company will attain profitable levels of operation. If the going concern assumption is not appropriate, material adjustments to the consolidated financial statements may be required.

3. BASIS OF CONSOLIDATION

These consolidated financial statements include the accounts of the Company, which is incorporated in Canada under the Canada Business Corporations Act, and its wholly owned subsidiaries, Corongo Exploraciones SAC ("Corongo"), Empresa Querco SAC ("Querco"), Mamaniña Exploraciones SAC ("Mamaniña Exploraciones") and Hatum Minas SAC ("Hatum Minas"), and it's 80% owned subsidiary companies Minera Aguila de Ora SAC ("Madosac") and Insumos Y Minerales del Notre SRL ("Insumos"), all of which were incorporated in Peru. Subsidiaries consist of entities over which the Company is exposed to, or has rights to, variable returns as well as the ability to affect those returns through the power to direct the relevant activities of the entity. Subsidiaries are fully consolidated from the date control is transferred to the Company and are de-consolidated from the date control ceases. All inter-company balances and transactions have been eliminated. The consolidated financial statements include all the assets, liabilities, revenues, expenses and cash flows of the Company and its subsidiaries after eliminating inter-entity balances and transactions.

3. BASIS OF CONSOLIDATION (continued)

For non-wholly owned, controlled subsidiaries, the net assets attributable to outside equity shareholders are presented as "non-controlling interests" in the equity section of the consolidated statement of financial position.

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

(a) Statement of Compliance

These consolidated financial statements of the Company and its subsidiaries were prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB"), and interpretations of the International Financial Reporting Interpretations Committee ("IFRIC").

The Company has consistently applied the accounting policies used in preparation of these consolidated financial statements throughout all the periods presented. Significant accounting judgements and estimates used by management in the preparation of these consolidated financial statements are presented in Note 5.

The policies applied in these consolidated financial statements are based on the IFRS issued and effective as of December 31, 2016. These consolidated financial statements were approved and authorized for issue by the Board of Directors on April 27, 2017.

(b) Basis of preparation

The consolidated financial statements are presented in Canadian dollars. The financial statements are prepared on the historical cost basis except for marketable securities which are measured at fair value. In addition, these consolidated financial statements have been prepared using the accrual basis of accounting except for cash flow information.

(c) Standards, Amendments and Interpretations Not Yet Effective

Certain pronouncements were issued by the IASB or the IFRS Interpretations Committee that are not mandatory for accounting periods beginning on or after January 1, 2017 or later periods. Many are not applicable or do not have significant impact to the Company and have been excluded. They have not been early adopted in these consolidated financial statements, and they are not expected to affect the Company in the period of initial application. In all cases the Company intends to apply these standards from application date as indicated below:

- IFRS 2 Share-based Payment

  IFRS 2 – Share-based Payment ("IFRS 2") was amended by the IASB in June 2016 to clarify the accounting for cash-settled share-based payment transactions that include a performance condition, the classification of share-based payment transactions with net settlement features and the accounting for modifications of share-based payment transactions from cash-settled to equity-settled. The amendments are effective for annual periods beginning on or after January 1, 2019, with earlier application permitted.

- IFRS 9 Financial Instruments

  IFRS 9 – Financial Instruments ("IFRS 9") was issued by the IASB in November 2009 with additions in October 2010 and will replace IAS 39 Financial Instruments: Recognition and Measurement ("IAS 39"). IFRS 9 uses a single approach to determine whether a financial asset is measured at amortized cost or fair value, replacing the multiple rules in IAS39. The approach in IFRS 9 is based on how an entity manages its financial instruments in the context of its business model and the

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(c) Standards, Amendments and Interpretations Not Yet Effective

contractual cash flow characteristics of the financial assets. Most of the requirements in IAS39 for classification and measurement of financial liabilities were carried forward unchanged to IFRS9, except that an entity choosing to measure a financial liability at fair value will present the portion of any change in its fair value due to changes in the entity's own credit risk in other comprehensive income, rather than within profit or loss. The new standard also requires a single impairment method to be used, replacing the multiple impairment methods in IAS39. IFRS 9 is effective for annual periods beginning on or after January 1, 2018. Earlier adoption is permitted.

- IFRS 16 Leases

  IFRS 16 – Leases ("IFRS 16") was issued in January 2016 and replaces IAS17 – Leases as well as some lease related interpretations. With certain exceptions for leases under twelve months in length or for assets of low value, IFRS16 states that upon lease commencement a lessee recognizes a right-of-use asset and a lease liability. The right-of-use asset is initially measured at the amount of the liability plus any initial direct costs. After lease commencement, the lessee shall measure the right-of-use asset at cost less accumulated depreciation and accumulated impairment. A lessee shall either apply IFRS 16 with full retrospective effect or alternatively not restate comparative information but recognize the cumulative effect of initially applying IFRS 16 as an adjustment to opening equity at the date of initial application. IFRS 16 requires that lessors classify each lease as an operating lease or a finance lease. A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership of an underlying asset. Otherwise it is an operating lease. IFRS 16 is effective for annual periods beginning on or after January 1, 2019. Earlier adoption is permitted it IFRS 15 has also been applied.

- IAS 7 Statement of Cash Flows

  IAS 7 – Statement of Cash Flows ("IAS 7") was amended in January 2016 to clarify that disclosures shall be provided that enable users of financial statements to evaluate changes in liabilities arising from financing activities. The amendments are effective for annual periods beginning on or after January 1, 2017.

- IFRIC 22 Foreign Currency Transactions and Advance Consideration

  IFRIC 22 – foreign Currency Transactions and Advance Consideration ("IFRIC 22") was issued in December 2016 and addresses foreign currency transactions or parts of transactions where there is consideration that is denominated in a foreign currency; a prepaid asset or deferred income liability is recognized in respect of that consideration, in advance of the recognition of the related asset, expense or income; and the prepaid asset or deferred income liability is non-monetary. The interpretation committee concluded that the date of the transaction, for purposes of determining the exchange rate, is the date of initial recognition of the non-monetary prepaid asset or deferred income liability. IFRIC 22 is effective for annual periods beginning on or after January 1, 2018. Earlier adoption is permitted.

There are no other IFRS or IFRIC Interpretations that are not yet effective that would be expected to have a material impact on the Company.

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(d) Share-based payments

The share option plan allows employees and consultants to acquire shares of the Company. The fair value of options granted is recognized as a share-based payment expense with a corresponding increase in share-based payment reserve. An individual is classified as an employee when the individual is an employee for legal or tax purposes (direct employee) or provides services similar to those performed by a direct employee. The fair value is estimated at the grant date and each tranche is recognized on a graded vesting basis over the period during which the options vest. The fair value of the options granted is estimated using the Black-Scholes option pricing model taking into account the terms and conditions upon which the options were granted. At each reporting date, the amount recognized in profit and loss is adjusted to reflect the actual number of share options that are expected to vest.

Share-based payments to non-employees are measured at the fair value of the goods or services received or the fair value of the equity instruments issued, if it is determined the fair value of the goods or services cannot be reliably measured, and are recorded at the date the goods or services are received.

The offset to the recorded cost is to share-based payments reserve.

Upon expiry of share options, the recorded value is transferred to deficit from share-based payment reserve.

(e) Income taxes

Income tax for the periods presented comprises current and deferred tax. Income tax is recognized in profit or loss except to the extent that it relates to items recognized directly in equity, in which case, it is recognized in equity.

Deferred taxes

Deferred income tax assets and liabilities are recognized for the estimated future income tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective income tax bases. The following temporary differences are not provided for: goodwill not deductible for tax purposes; the initial recognition of assets or liabilities that affect neither accounting or taxable profit; and differences relating to investments in subsidiaries to the extent that they will probably not reverse in the foreseeable future. The amount of deferred tax provided is based on the expected manner of realization or settlement of the carrying amount of assets and liabilities.

Deferred income tax assets and liabilities are measured using income tax rates in effect for the period in which those temporary differences are expected to be recovered or settled based on the tax rates that have been enacted or substantively enacted by the end of the reporting period. The effect on deferred income tax assets and liabilities of a change in income tax rates or laws is recognized as part of the provision for income taxes in the period the changes are considered substantively enacted.

A deferred tax asset is recognized only to the extent that it is probable that future taxable profits will be available against which the asset can be utilized. Deferred tax liabilities are generally recognized for all taxable temporary differences. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realized.

Current tax

This is the expected tax payable on taxable income for the year, using tax rates enacted or substantively enacted at period end adjusted for amendments to tax payable with regards to previous years.

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(f) Exploration and evaluation assets and expenditures

Exploration and evaluation expenditures are expensed as incurred except for expenditures associated with the acquisition of exploration and evaluation assets through a business combination. Exploration and evaluation expenditures include the costs of acquiring licenses and costs associated with exploration and evaluation activity. Once the technical feasibility and commercial viability of the extraction of mineral resources in an area of interest are demonstrable, exploration and evaluation assets attributable to that area of interest are reclassified to mining property and development assets within property, plant and equipment.

Recoverability of the carrying amount of the exploration and evaluation assets is dependent on successful development and commercial exploitation, or alternatively, sale of the respective areas of interest.

(g) Property, plant and equipment

Property, plant and equipment is carried at cost, less accumulated amortization and accumulated impairment losses. The initial cost of an asset comprises its purchase price or construction cost, any costs directly attributable to bringing the assets to a working condition for their intended use, the initial estimate of the rehabilitation provisions, and for qualifying assets, borrowing costs. The purchase price or construction cost is the aggregate amount paid and the fair value of any other consideration given to acquire the asset. Costs associated with the commissioning of new assets, in the period before they are operating in the way intended by management, are capitalized, net of any pre-production revenues. Where an item of property, plant and equipment or mine properties comprises significant components with different useful lives, the components are accounted for as separate items of property, plant and equipment. Depreciation is determined at rates which will reduce original cost to estimated residual value over the expected useful life of each asset. Depreciation of the plant will commence when the commissioning is complete and it is available for its intended use.

(h) Impairment of non-financial assets

At each reporting date the carrying amounts of the Company’s property, plant and equipment and exploration and evaluation assets are reviewed to determine whether there is any indication that those assets are impaired. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment, if any. The recoverable amount is the higher of fair value less costs to sell and value in use. Fair value is determined as the amount that would be obtained from the sale of the asset in an arm’s length transaction between knowledgeable and willing parties. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. If the recoverable amount of an asset is estimated to be less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount and the impairment loss is recognized in the consolidated statement of operations for the period.

Impairment is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets. If this is the case, the individual assets of the Company are grouped together into cash generating units (“CGUs”) for impairment purposes. Such CGUs represent the lowest level for which there are separately identifiable cash inflows that are largely independent of the cash flows from other assets. This generally results in the Company evaluating its non-financial assets on a geographical or license basis.

Where an impairment loss subsequently reverses, the carrying amount of the asset (or CGU) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognized for the asset (or CGU) in prior years. A reversal of an impairment loss is recognized immediately in profit or loss.

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(i) Foreign currencies

The functional and presentation currency of the Company and its subsidiaries is the Canadian dollar. The Company's foreign subsidiaries are considered extensions of the parent company. Monetary assets and liabilities are translated to Canadian dollars at the rate in effect at the reporting date. Non-monetary items are translated at historical rates. Revenue and expenses are translated at the average exchange rate for the period. The resulting gain or loss is included in the consolidated statement of operations.

(j) Financial assets and liabilities

Financial assets are classified as either financial assets at fair value through profit or loss, loans and receivables, held-to-maturity investments, or available-for-sale financial assets, as appropriate. The Company determines the classification of its financial assets at initial recognition.

The Company's financial assets and liabilities include cash, marketable securities, amounts receivable and accounts payable and accrued liabilities.

The Company has designated its cash and amounts receivable as loans and receivables, which are measured at amortized cost. Marketable securities have been classified as available-for-sale ("AFS") and are recorded at their fair values with changes in fair value included in other comprehensive loss until the asset is removed from the statement of financial position or until impairment is assessed as other than temporary. Regular purchases and sales of financial assets are recognized on the trade-date, the date on which the Company commits to purchase or sell the asset. Accounts payable and accrued liabilities are classified as other financial liabilities, which are measured at amortized cost.

Transaction costs associated with fair value through profit and loss financial assets and financial liabilities are expensed as incurred, while transaction costs associated with all other financial assets and other financial liabilities are included in the initial carrying amount of the asset or the liability.

Fair values are determined directly by reference to published price quotations in an active market. Changes in the fair value of these instruments are reflected in other comprehensive loss and included in shareholders' equity on the consolidated statement of financial position. All other non-derivative financial instruments were recorded at amortized cost, subject to impairment reviews.

Financial instruments recorded at fair value on the consolidated statement of financial position are classified using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

Level 1 - valuation based on quoted prices (unadjusted) in active markets for identical assets or liabilities;
Level 2 - valuation techniques based on inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and
Level 3 - valuation techniques using inputs for the asset or liability that are not based on observable market data (unobservable inputs).

As at December 31, 2016, the Company had no financial instruments to classify in the fair value hierarchy. As at December 31, 2015, the Company had marketable securities that were classified as Level 1.

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(k) Impairment of financial assets (continued)

A financial asset not carried at fair value through profit or loss is assessed at each reporting date to determine whether there is objective evidence that it is impaired. A financial asset is impaired if objective evidence indicates that a loss event has occurred after the initial recognition of the asset, and that the loss event had a negative effect on the estimated future cash flows of that asset that can be measured reliably. An impairment loss in respect of a financial asset measured at amortized cost is calculated as the difference between its carrying amount and the present value of the estimate future cash flows discounted at the asset's original effective interest rate. Losses are recognized in profit or loss and reflected in an allowance account against receivables. Interest on the impaired asset continues to be recognized through the unwinding of the discount. When a subsequent event causes the amount of impairment loss to decrease, the decrease in impairment loss is reversed through profit or loss.

(l) Decommissioning and restoration provisions

An obligation to incur restoration, rehabilitation and environmental costs arises when environmental disturbance is caused by the exploration, development or ongoing production of a mineral property interest. Such costs arising for the decommissioning of plant and other site preparation work, discounted to their net present value, are provided for as soon as the obligation to incur such costs arises. Discount rates using a pre-tax rate that reflect the time value of money are used to calculate the net present value. These costs are charged to profit or loss over the economic life of the related asset, through amortization using either the unit-of-production or the straight line method. The related liability is adjusted for each period for the unwinding of the discount rate and for changes to the current market-based discount rate, amount or timing of the underlying cash flows needed to settle the obligation. Costs for restoration of subsequent site damage which is created on an ongoing basis during production are provided for at their net present values and charged against profits as extraction progresses. Changes in closure and reclamation estimates are accounted for as a change in the corresponding capitalized costs. Costs rehabilitation projects for which a provision has been recorded are recorded directly against the provision as incurred, most of which are incurred at the end of the life of the mine.

The Company did not have any significant decommissioning and restoration provisions as of December 31, 2016 and 2015.

Other provisions and liabilities are recognized in the period when it becomes probable that there will be a future outflow of funds resulting from past operations or events and the amount of cash flow and timing can be reliably estimated.

(m) Loss per share

Basic loss per common share is calculated by dividing the loss attributed to shareholders for the period by the weighted average number of common shares outstanding in the period. Diluted loss per common share is calculated by adjusting the weighted average number of common shares outstanding to assume conversion of all dilutive potential common shares. In the Company's case, diluted loss per share is the same for the years ended December 31, 2016 and 2015 as basic loss per share as the effects of including all outstanding options and warrants would be anti-dilutive.

(n) Joint ventures

A portion of the Company's exploration activities may be conducted jointly with others wherein the Company enters into agreements that provide for specified percentage interests in mineral properties. Joint venture accounting is applied by the Company only when the parties have earned their respective interests and enter into formal comprehensive agreements for ownership and exploration participation. The Company was not party to any joint ventures as of December 31, 2016 and 2015.

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(o) Segment reporting

An operating segment is a component of the Company that engages in business activities from which it may earn revenues, incur expenses, including revenues and expenses that relate to transactions with any of the Company's other components. The Company operates in one business segment, mineral exploration and two geographical segments, Peru and Canada, as at December 31, 2016 and 2015.

(p) Foreign exchange forward contracts

Foreign exchange forward contracts are valued at the fair value thereof on the reporting date. The estimated fair value of these forward contracts is the gain or loss that would be realized if, on the reporting date, the positions were to be closed out. When the forward contracts are transferred or expire, realized gains or losses on forward contracts are recognized and are included in profit or loss as net realized gain (loss) on derivative instruments. The fair value of foreign exchange forward contracts is determined using estimated forward currency exchange rates.

(q) Inventory

The cost of ore stockpiles is comprised of the cost to purchase such stockpiles along with the costs incurred to transport the stockpiles to the Company's plant. Production costs include the cost of materials, labour, production overheads and depreciation to the applicable stage of processing. Substantially all of the Company's inventory at December 31, 2016 is comprised of ore stockpiles purchased by the Company to be processed.

Provisions are recorded to reduce the carrying amount of inventory to net realizable value to reflect changes in grades, quantity or other economic factors and to reflect current intentions for the use of redundant or slow-moving items. Provisions for redundant and slow-moving items are made by reference to specific items of inventory. The Company reverses write-downs where there is subsequent increase in net realizable value and where the inventory is still on hand.

Spare parts, stand-by and servicing equipment held are generally classified as inventories. Major capital spare parts and stand-by equipment (insurance spares) are classified as a component of property, plant and equipment.

5. SIGNIFICANT ACCOUNTING JUDGMENTS AND ESTIMATES

The preparation of consolidated financial statements in conformity with IFRS requires the Company's management to make judgments, estimates and assumptions about future events that affect the amounts reported in the consolidated financial statements and related notes to the financial statements. Although these estimates are based on management's best knowledge of the amount, event or actions, actual results may differ from those estimates and these differences could be material.

The areas which require management to make significant judgments, estimates and assumptions in determining carrying values include, but are not limited to:

- Assets' carrying values and impairment charges
  In the determination of carrying values and impairment charges, management looks at the higher of recoverable amount or fair value less costs to sell in the case of assets and at objective evidence, significant or prolonged decline of fair value on financial assets indicating impairment. These determinations and their individual assumptions require that management make a decision based on the best available information at each reporting period.

- Capitalization of exploration and evaluation costs
  Management has determined that capitalized exploration and evaluation costs have future economic benefits and are economically recoverable. In making this judgment, management has assessed various

5. SIGNIFICANT ACCOUNTING JUDGMENTS AND ESTIMATES (continued)

sources of information including but not limited to the geologic and metallurgic information, history of conversion of mineral deposits to proven and probable mineral reserves, scoping and feasibility studies, proximity of operating facilities, operating management expertise and existing permits. See Note 9 for details of capitalized exploration and evaluation costs.

- Mineral reserve estimates
  The figures for mineral reserves and mineral resources are determined in accordance with National Instrument 43-101, "Standards of Disclosure for Mineral Projects", issued by the Canadian Securities Administrators. There are numerous uncertainties inherent in estimating mineral reserves and mineral resources, including many factors beyond the Company's control. Such estimation is a subjective process, and the accuracy of any mineral reserve or mineral resource estimate is a function of the quantity and quality of available data and of the assumptions made and judgments used in engineering and geological interpretation. Differences between management's assumptions including economic assumptions such as metal prices and market conditions could have a material effect in the future on the Company's financial position and results of operation.

- Impairment of exploration and evaluation assets
  While assessing whether any indications of impairment exist for exploration and evaluation assets, consideration is given to both external and internal sources of information. Information the Company considers includes changes in the market, economic and legal environment in which the Company operates that are not within its control that could affect the recoverable amount of exploration and evaluation assets. Internal sources of information include the manner in which exploration and evaluation assets are being used or are expected to be used and indications of expected economic performance of the assets. Estimates may include but are not limited to estimates of the discounted future pre-tax cash flows expected to be derived from the Company's mining properties, costs to sell the properties and the appropriate discount rate. Reductions in metal price forecasts, increases in estimated future costs of production, increases in estimated future capital costs, reductions in the amount of recoverable mineral reserves and mineral resources and/or adverse current economics can result in a write-down of the carrying amounts of the Company's exploration and evaluation assets.

- Estimation of decommissioning and restoration costs and the timing of expenditure
  Decommissioning, restoration and similar liabilities are estimated based on the Company's interpretation of current regulatory requirements, constructive obligations and are measured at fair value. Fair value is determined based on the net present value of estimated future cash expenditures for the settlement of decommissioning, restoration or similar liabilities that may occur upon decommissioning of the mine. Such estimates are subject to change based on changes in laws and regulations and negotiations with regulatory authorities.

- Income, value added, withholding and other taxes
  The Company is subject to income, value added, withholding and other taxes. Significant judgment is required in determining the Company's provisions for taxes. There are many transactions and calculations for which the ultimate tax determination is uncertain during the ordinary course of business. The Company recognizes liabilities for anticipated tax audit issues based on estimates of whether additional taxes will be due. The determination of the Company's income, value added, withholding and other tax liabilities requires interpretation of complex laws and regulations. The Company's interpretation of taxation law as applied to transaction and activities may not coincide with the interpretation of the tax authorities. All tax related filings are subject to government audit and potential reassessment subsequent to the financial statement reporting period. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the tax related accruals and deferred income tax provisions in the period in which such determination is made.

5. SIGNIFICANT ACCOUNTING JUDGMENTS AND ESTIMATES (continued)

- Share-based payments
  Management determines costs for share-based payments using market-based valuation techniques. The fair value of the market-based and performance-based share awards are determined at the date of grant using generally accepted valuation techniques. Assumptions are made and judgment used in applying valuation techniques. These assumptions and judgments include estimating the future volatility of the stock price, expected dividend yield, future employee turnover rates and future employee stock option exercise behaviors and corporate performance. Such judgments and assumptions are inherently uncertain. Changes in these assumptions affect the fair value estimates.

- Contingencies
  See Notes 2 and 20.

6. MARKETABLE SECURITIES

The Company's marketable securities consist of Nil (2015 – 100,000) common shares of Quikflo Health Inc. (formerly Viper Gold Ltd.) and Nil (2015 –215,560) common shares of Rio Silver Inc. ("Rio Silver"). The fair value of the listed available-for-sale investment has been determined directly by reference to published price quotations in an active market. During 2016, the Company sold all of its marketable securities for proceeds of $22,005 and realized a loss of $149,306.

7. DERIVATIVE INSTRUMENTS

Foreign exchange forward contracts

The Company does not apply hedge accounting to account for its foreign exchange forward contracts. The Company did not enter into any foreign exchange forward contracts during the year ended December 31, 2016 and had no foreign exchange forward contracts outstanding as at December 31, 2016 and 2015. On March 31, 2015 the Company settled US$500,000 for a realized net gain of $57,050. On May 26, 2015 the Company settled the remaining US$2,500,000 for a realized net gain of $251,550, resulting in a total realized net gain of $308,600 for the year ended December 31, 2015.

8. PROPERTY, PLANT AND EQUIPMENT

Cost	Office furniture and equipment	Computer equipment	Field equipment	Plant	Total
	$	$	$	$	$
Balance at December 31, 2014	29,582	27,297	15,148	-	72,027
Additions	-	-	-	414,184	414,184
Balance at December 31, 2015	29,582	27,297	15,148	414,184	486,211
Additions	-	1,294	-	1,545,513	1,546,807
Balance at December 31, 2016	29,582	28,591	15,148	1,959,697	2,033,018

Amortization and impairment	Office furniture and equipment	Computer equipment	Field equipment	Plant	Total
	$	$	$	$	$
Balance at December 31, 2014	28,291	24,462	8,250	-	61,003
Additions	1,291	2,835	308	-	4,434
Balance at December 31, 2015	29,582	27,297	8,558	-	65,437
Additions	-	324	308	-	632
Balance at December 31, 2016	29,582	27,621	8,866	-	66,069

Carrying amounts	Office furniture and equipment	Computer equipment	Field equipment	Plant	Total
	$	$	$	$	$
At December 31, 2015	-	-	6,590	414,184	420,774
At December 31, 2016	-	970	6,282	1,959,697	1,966,949

As at December 31, 2016 and 2015, the plant is not yet available for use. Therefore no amortization has been taken on this asset.

The net book value of the Company's property, plant and equipment at December 31, 2016 by geographic location is as follows: Canada - $Nil (2015 - $Nil), and Peru $1,966,949 (2015 - $420,774).

As at December 31, 2016, the Company had paid $Nil (2015 - $250,921) in equipment deposits.

See Note 12.

9. EXPLORATION AND EVALUATION ASSETS

	December 31, 2014	Write-down	December 31, 2015	Write-up	December 31, 2016
	$	$	$	$	$
Peru

Total Exploration Properties	1,470,906	(888,855)	582,051	221,000	803,051

Hatum Minas Properties
In July 2010, the Company acquired certain mineral properties in Peru (the "Hatum Minas Properties") through an amalgamation with Double Jack Mines Limited ("Double Jack"). The Company issued 9,393,346 common shares (valued at $1,268,102) to the Double Jack shareholders as consideration.

The Hatum Minas Properties include the Ichuña copper-silver project, the Panteria porphyry copper project, and the Don Pancho silver-lead-zinc polymetallic projects. Title to the Hatum Minas Properties is held by the Company's wholly-owned Peruvian subsidiary, Hatum Minas SAC. The Company has been unable to

9. EXPLORATION AND EVALUATION ASSETS (continued)

Hatum Minas Properties (continued)
source a joint venture partner for these projects. For financial reporting purposes and considering current market conditions, the Company recorded a reversal of impairment of exploration and evaluation assets of $221,000 during the year ended December 31, 2016 (2015 - Write-down of $888,855). See subsequent events (Note 22).

See Exploration and Evaluation Expenditures (Note 13).

10. CAPITAL STOCK AND WARRANT RESERVE

a) Authorized, Issued and Outstanding shares

Authorized - unlimited number of common shares with no par value,
- 100,000,000 preferred shares with no par value

A summary of common shares outstanding as at December 31, 2016 and 2015 and changes during the years then ended are presented below:

	Shares #	Amount $
Balance, December 31, 2014	33,449,981	49,805,521
Issued for services (i)	71,428	25,000
Balance, December 31, 2015	33,521,409	49,830,521
Issued in private placement (iii)	12,326,921	1,109,423
Value assigned to warrants issued in private placement, net of costs (iii)	-	(504,459)
Share issue costs (iii)	-	(33,179)
Balance, December 31, 2016	45,848,330	50,402,306

(i) In December 2015, the Company received TSX Venture approval to settle an aggregate of $25,000 indebtedness owed to Alpha Resources Advisors S.A.C. ("Alpha") through the issuance of 71,428 common shares at a deemed price of $0.35 per common share.

(ii) On April 8, 2016, the Company's shareholders approved the consolidation of the Company's common shares at a ratio of seven (7) pre-consolidation shares to one (1) post-consolidation share. The consolidation came into effect on May 9, 2016. As at December 31, 2016, 2015 and 2014 the common shares, stock options and warrants of the Company have been restated on a proportional basis to reflect the consolidation.

(iii) During the year ended December 31, 2016 the Company completed a non-brokered private placement financing (the "Offering"). In total the Offering consisted of 12,326,921 Units for aggregate gross proceeds to the Company of $1,109,423. Each Unit consisted of one common share and one common share purchase warrant. Each warrant entitles the holder thereof to purchase one additional common share at an exercise price of $0.15 for a period of two years from the closing of each tranche of the Offering. The Company paid total finder's fees of $32,614 and issued 12,000 broker warrants (valued at $565) which entitles the holder to purchase 12,000 common shares at an exercise price of $0.09 until July 25, 2018. All securities issued in the Offering are subject to a hold period of four months and one day from date of issue.

10. CAPITAL STOCK AND WARRANT RESERVE (continued)

b) Share Purchase Warrants

A summary of warrants outstanding as at December 31, 2016 and 2015 and changes during the years then ended are presented below:

	Warrants #	Amount $	Weighted average exercise price $
Balance December 31, 2014	1,221,666	140,664	1.47
Expired	(1,221,666)	(140,664)	1.47
Balance December 31, 2015	-	-	
Issued in private placement (i)	12,326,921	512,542	0.15
Broker warrants (i)	12,000	565	0.09
Issue cost	-	(8,648)	
Balance December 31, 2016	12,338,921	504,459	0.15

(i) As a result of the Offering the Company issued 12,326,921 common share purchase warrants (valued at $512,542) with an exercise price of $0.15. In addition the Company issued 12,000 broker warrants (valued at $565) which entitle the holder to purchase 12,000 common shares at an exercise price of $0.09 until July 25, 2018. The fair value of the common share purchase warrants and the broker warrants issued in the private placement was estimated at the date of grant using the Black-Sholes pricing model with the following assumptions: expected dividend yield 0%, expected volatility 252%, risk free interest rate of 0.99% and an expected life of two years.

The following warrants are outstanding as at December 31, 2016:

Expiry date	Number of warrants outstanding	Exercise price $	Weighted average remaining contractual life (years)
July 25, 2018	12,000	0.09	1.56
July 25, 2018	6,718,421	0.15	1.56
August 12, 2018	1,180,000	0.15	1.61
September 30, 2018	2,825,000	0.15	1.75
October 7, 2018	1,603,500	0.15	1.77
	12,338,921		1.64

11. SHARE-BASED PAYMENTS – EMPLOYEE SHARE OPTION PLAN

The Company has adopted a share option plan (the "Plan") for its directors, officers, employees and consultants to acquire common shares of the Company at a price determined by the fair market value of the shares at the date immediately preceding the date on which the option is granted. The terms and conditions of the options are determined by the Board of Directors.

The aggregate number of share options shall not exceed 10% of the issued and outstanding common shares of the Company, and if any option granted under the Plan expires or terminates for any reason in accordance with the terms of the Plan without being exercised, that option shall again be available for the purpose of the Plan. In addition, the exercise price of options granted under the Plan shall not be lower than the exercise price permitted by the TSX Venture Exchange, and all options granted under the plan will have a term not to exceed five years after issuance. All options issued since May 2010 have vested 100% on the date of grant.

11. SHARE-BASED PAYMENTS – EMPLOYEE SHARE OPTION PLAN (continued)

A summary of the status of the Plan as at December 31, 2016 and 2015, and changes during the years ended on those dates are presented below:

	Number of options #	Weighted average exercise price $
Balance, December 31, 2014	2,000,000	1.33
Expired	(592,857)	1.05
Balance, December 31, 2015	1,407,143	1.33
Expired	(778,573)	1.90
Balance, December 31, 2016	628,570	0.87

As at December 31, 2016, the Company had outstanding share options issued to directors, officers and employees of the Company as follows:

Date of Grant	Options Outstanding #	Options Vested #	Exercise Price $	Expiry Date
January 11, 2012	85,714	85,714	1.68	January 10, 2017
April 18, 2012	71,428	71,428	1.05	April 18, 2017
June 28, 2012	392,857	392,857	0.70	June 28, 2017
August 20, 2012	28,571	28,571	0.70	August 20, 2017
February 19, 2013	50,000	50,000	0.70	February 18, 2018
	628,570	628,570		

The weighted average remaining contractual life of options issued and outstanding as at December 31, 2016 was 0.46 years (December 31, 2015 was 1.81 years).

12. INVESTMENT IN INSUMOS

On September 14, 2015, the Company and its wholly-owned subsidiary, Madosac, entered into an agreement with a private Peruvian company, Insumos, to establish a mineral processing plant in northern Peru. Under the terms of the agreement Duran was required to invest US$1.5million and establish a line of credit of US$250,000 for the purpose of general working capital for the start-up. Insumos holds the concessions on which the plant was being built. The Company has the necessary permits in place to construct the mineral processing plant.

On November 7, 2016, the Company and Insumos finalized the transaction and 20% of the outstanding shares of Madosac were transferred to the majority shareholder of Insumos in exchange for 80% of the outstanding shares of Insumos. As the Company received 80% of the outstanding shares of Insumos, the Company consolidated Insumos for the period of November 7, 2016 to December 31, 2016 in its consolidated financial statements as at and for the year ended December 31, 2016. The transaction has been accounted for as an asset acquisition.

12. INVESTMENT IN INSUMOS (continued)

The assets acquired and liabilities of Insumos were recorded at their estimated fair market values as follows:

Purchase Price Consideration Paid		
Estimated fair value of Madosac shares issued	$	48,049
Net Assets Acquired		
Cash	$	4,415
Amounts receivable		2,382
Inventory		17,108
Mining concessions		127,535
Accounts payable and accruals		(91,379)
Non-controlling interest		(12,012)
	$	48,409

13. EXPLORATION AND EVALUATION EXPENDITURES

Total exploration and evaluation expenditures are as follows:

	$
Balance, December 31, 2014	14,237,866
Additions	1,848,905
Recovery	(69,200)
Balance, December 31, 2015	16,017,571
Additions	625,994
Balance, December 31, 2016	16,643,565

During the year ended December 31, 2016, the Company had net exploration and evaluation expenditures of $625,994 (December 31, 2015 – net expenditures of $1,779,705).

Mamaniña Project
The Company holds a 100% interest in the Mamaniña copper/gold project located in north central Peru. Title to the concessions comprising this project is held by Mamaniña Exploraciones.

Panteria Project
The Company holds a 100% interest in the Panteria phorphyry copper project located in south central Peru. Title to the concessions comprising this project is held by Hatum Minas.

On March 11, 2016 the Company entered into an option agreement (the "Agreement") on its Panteria project with Minera Antares Peru SAC – a wholly owned subsidiary of First Quantum Minerals Ltd. (collectively "FQM").

Under the terms of the Agreement, FQM can conduct due diligence studies for up to 18 months before proceeding to earn up to 80% of the Project by delineation of a resource greater than 1 million tonnes of copper equivalent and making a series of staged payments over 5 years. If FQM proceed to a decision to mine they have the option to buy the remaining 20% equity from Duran for US $0.02 per lb of copper equivalent based on 20% of delineated reserves. Duran will retain a 0.5% Net Smelter Royalty ("NSR").

13. EXPLORATION AND EVALUATION EXPENDITURES (continued)

Panteria Project (continued)
The Agreement outlines an exploration and development schedule divided into 3 states:

Stage 1: Duran will assign all exploration rights to FQM and FQM will contract Duran's community relations team in order to obtain community approval as a pre-requisite for the environmental permit (DIA). FQM will have the rights to carry out due diligence studies over a period of 18 months subsequent to receiving the aforementioned community approval.

Stage 2: FQM may earn an 80% interest in the Project by defining a mineral resource, and reporting the resource in compliance with National Instrument 43-101, in excess of 1 million tonnes of copper equivalent within 5 years and making a series of escalating payments with a maximum cumulative total of US $500,000 (First Option).

Stage 3: FQM will be granted a Second Option to purchase Duran's remaining 20% interest by carrying out additional technical/feasibility studies and declaring a "decision to mine". The purchase amount will be calculated by applying a value of US$0.02 per pound of copper equivalent to 20% of reserves. Duran will also be paid a NSR of 0.5% on all metal production from any subsequent mining operation (capped annually at US$15 million) except in the case where FQM elects not to exercise the Second Option and Duran contributes its proportion of project development and construction costs. Duran's 20% interest will be free-carried through to a decision to mine.

Don Pancho Project
The Company holds a 100% interest in the Don Pancho silver lead zinc project located in central Peru. Title to the Don Pancho Project is held by Hatum Minas. See subsequent events (Note 22).

Ichuña Project
The Company holds a 100% interest in the Ichuña copper/silver project, located in southern Peru. Title to the Ichuña Project is held by Hatum Minas. See subsequent events (Note 22).

Minasnioc Project
The Minasnioc Gold Project concession is located in the Department of Huancavelica, approximately 300 kilometres southeast of Lima. Title to the Minasnioc Gold Project property is held by Querco.

In December 2015 the Company entered into an agreement with a private Peruvian mining company (the "Optionee") whereby the Optionee can earn a 100% interest in the Minasnioc Project by paying Duran US$50,000 (received $69,200) and US$700,000 ($904,190) by December 2017, subject to the Optionee receiving approval from the local Minasnioc community. Community approval was received in August 2016. The Company will also be entitled to a 1.0% NSR on all concessions except for certain concessions acquired from Barrick Gold Corp. in April 2012.

Huachocolpa Properties
The Company holds a 100% interest in the Huachocolpa Properties, which consist of 82 contiguous and non-contiguous mining concessions in the Department of Huancavelica, approximately 260 kilometres southeast of Lima. Title to the Huachocolpa Properties is held by Corongo.

14. LOSS PER SHARE

a) Basic

Basic loss per share is calculated by dividing the net loss by the weighted average number of common shares in issue during the year.

	Year Ended December 31,	
	2016	2015
Net loss for the year	2,436,022	2,643,671
Weighted average number of common shares outstanding	37,995,598	33,456,048
Loss per share	0.06	0.08

b) Diluted

Diluted loss per common share is equal to the basic loss per common share for the years ended December 31, 2016 and 2015 as all of the stock options and warrants outstanding are anti-dilutive.

15. PLANT START-UP EXPENSES

	Year-ended December 30,	
	2016	2015
	$	$
Salaries and management fees	616,604	-
Office and general	101,981	-

Amortization	632	4,434
	819,432	712,789

17. RELATED PARTY TRANSACTIONS

Related parties include officers of the Company, the Board of Directors, close family members and enterprises which are controlled by these individuals as well as certain persons performing similar functions. Key management personnel are those persons having authority and responsibility for planning, directing and controlling the activities of the Company directly or indirectly, including the directors of the Company. The remuneration of key management personnel of the Company for the years ended December 31, 2016 and 2015 were as follows.

	2016 $	2015 $
Aggregate cash compensation	630,131	604,537
Director's fees	-	35,500
	630,131	640,037

As at December 31, 2016, a balance of $139,394 (2015 - $76,018) was due to certain officers and directors of the Company. These amounts are unsecured, non-interest bearing with no fixed terms of repayment.

Certain directors and offices of the Company subscribed for 3,866,667 Units in connection with the Offering as disclosed in Note 10 (a)(iii).

No stock options were granted to related parties under the Company's stock option plan during the years ended December 31, 2016 and 2015.

18. FINANCIAL RISK FACTORS

The Company may be exposed to risks of varying degrees of significance that could affect its ability to achieve its strategic objectives. The main objectives of the Company's risk management process are to ensure that risks are properly identified and that the capital base is adequate in relation to those risks. The principal risks to which the Company is exposed are described below. There have been no significant changes in the risks, objectives, policies and procedures from the previous period.

a) Credit risk management

Credit risk relating to cash and amounts receivable arises from the possibility that any counterparty to an instrument fails to perform. The Company does not feel there is significant counterparty risk that could have an impact on the fair value of cash and receivables.

b) Liquidity risk

The Company has in place a planning and budgeting process to help determine the funds required to support the Company's normal operating requirements on an ongoing basis and its capital, development and exploration expenditures. The Company ensures that there are sufficient funds to meet its short-term requirements, taking into account its anticipated cash flows from operations and its holdings of cash.

Cash includes cash on hand and balances with banks. The deposits are held in a Canadian chartered bank or a financial institution controlled by a Canadian chartered bank.

As of December 31, 2016, the Company had a cash balance of $43,003 (2015 - $2,497,888) to settle current accounts payable and accrued liabilities of $593,958 (2015 - $221,583). The Company's other current assets consist of marketable securities of $Nil (2015 - $34,311), amounts receivable of $84,100 (2015 - $63,389), prepaid expenses and advances of $57,503 (2015 - $58,681) and inventory of $145,681 (2015 - $Nil).

18. FINANCIAL RISK FACTORS (continued)

c) Market risk

At the present time, the Company does not hold any interest in a mining property that is in production. The Company's viability and potential success depends on its ability to develop, exploit, and generate revenue from the development of mineral deposits. Revenue, cash flow, and profits from any future mining operations in which the Company is involved will be influenced by precious and/or base metal prices and by the relationship of such prices to production costs. Such prices can fluctuate widely and are affected by numerous factors beyond the Company's control.

d) Foreign exchange risk

The Company's financings are in Canadian dollars. Certain of the Company's transactions with its subsidiaries are incurred in foreign currencies and are therefore subject to gains or losses due to fluctuations in exchange rates.

As at December 31, 2016, the Company had cash balances of $969 (US$788) (2015 - $1,865,369 (US$1,347,810)) in U.S. dollars, and $13,430 (S/. 33,567) (2015 - $18,202 (S/. 44,876) in Peruvian New Sol ("PNS"); and accounts payable of $100,454 (S/.251,072) (2015 – $111,611 (S/.275,176)) in PNS.

Sensitivity to a plus or minus 5% change in the foreign exchange rate would have affected the net loss by approximately $560 for the year ended December 31, 2016 based on the net foreign currency monetary assets as at December 31, 2016.

The objective of the Company's foreign exchange risk management activities is to minimize transaction exposure associated with the Company's foreign currency-denominated cash balances. The Company utilizes foreign exchange forward contracts to manage foreign exchange risks from time to time, at the determination of management.

e) Interest rate risk

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The majority of the Company's cash balances earn interest at fixed rates over the next three to twelve months. It is management's opinion that the Company is not exposed to significant interest rate risk. The Company has no interest bearing debt.

A sensitivity analysis has determined that an interest rate fluctuation of 1% would not have resulted in significant fluctuation in the interest income during the year ended December 31, 2016.

f) Fair value of financial assets and liabilities

The book values of the cash, amounts receivable and accounts payable and accrued liabilities, approximate their respective fair values due to the short-term nature of these instruments.

18. FINANCIAL RISK FACTORS (continued)

f) Fair value of financial assets and liabilities (continued)

The fair values together with the carrying amounts shown in the statement of financial position are as follows:

	Carrying amount	Fair Value	Carrying amount	Fair Value
	As at December 31, 2016		As at December 31, 2015	
	$	$	$	$
Cash	43,003	43,003	2,497,888	2,497,888
Marketable securities	-	-	34,311	34,311
Amounts receivable	84,100	84,100	47,738	47,738
Accounts payable and accrued liabilities	(593,958)	(593,958)	(221,583)	(221,583)

19. CAPITAL RISK MANAGEMENT

The Company defines capital as shareholders' equity which at December 31, 2016 was $2,506,329 (2015 - $3,686,432). The Company manages its capital structure and makes adjustments to it, in order to have the funds available to support its exploration, development and operation activities.

The Company's objective when managing capital is to safeguard the Company's ability to continue as a going concern in order to pursue the exploration of its mineral properties and maximize shareholder returns. The Company satisfies its capital requirements through careful management of its cash resources and by utilizing bank indebtedness or equity issues, as necessary, based on the prevalent economic conditions of both the industry and the capital markets and the underlying risk characteristics of the related assets. As at December 31, 2016 and 2015, the Company had no bank debt.

Management reviews its capital management approach on an ongoing basis. There were no significant changes in the Company's approach to capital management during the years ended December 31, 2016 and 2015. The Company and its subsidiaries are not subject to externally imposed capital requirements other than Policy 2.5 of the TSX Venture Exchange, which requires adequate working capital or financial resources to maintain operations and cover general and administrative expenses for a period of 6 months.

As of December 31, 2016, the Company may not be compliant with the policies of the TSXV. The impact of this violation is not known and is ultimately dependent on the direction of the TSXV.

20. COMMITMENTS AND CONTINGENCIES

Lease agreements

Effective August 1, 2016 the Company entered into an agreement to sublease office space expiring on January 30, 2018. The annual lease payment, before sublease income, is $32,400.

The Company's subsidiary, Madosac, has annual office rental obligations of US$20,400 ($28,234).

Management contracts

Effective January 1, 2015, the Company entered into certain management and consulting contracts. Minimum annual payments are approximately $355,000. These contracts also require that additional payments of up to $1,086,200 be made upon the occurrence of certain events such as a change of control. As a triggering event has not taken place, the contingent payments have not been reflected in these consolidated financial statements.

20. COMMITMENTS AND CONTINGENCIES (continued)

Environmental matters

The Company's exploration activities are subject to various laws and regulations governing the protection of the environment. These laws and regulations are continually changing and generally becoming more restrictive. The Company has made, and expects to make in the future, expenditures to comply with such laws and regulations.

Legal proceeding

The Company is, from time to time, involved in various claims and legal proceedings. The Company cannot reasonably predict the likelihood or outcome of these activities. The Company does not believe that adverse decisions in any pending or threatened proceedings related to any matter, or any amount which may be required to be paid by reasons thereof, will have a material effect on the financial condition or future results of operations. As at December 31, 2016 and 2015, no amounts have been accrued related to such matters.

21. INCOME TAXES

a) Provision for Income Taxes

Major items causing the Company's income tax rate to differ from the Canadian statutory rate of approximately 26.5% (2015 – 26.5%) were as follows:

	2016 $	2015 $
(Loss) income before income taxes	(2,453,297)	(2,798,271)
Expected income tax recovery based on statutory rate	(650,000)	(742,000)
Adjustments to expected income tax benefit:		
Expiry and use of non-capital losses	5,000	151,000
Expenses not deductible for tax purposes	112,000	-
Other	8,000	(393,000)
Effect of tax rates in foreign jurisdictions	(39,000)	(49,000)
Foreign exchange	12,000	(147,000)
Tax benefits not recognized	552,000	1,051,000
Income tax (recovery)	-	(129,000)
Deferred taxes recognized directly in equity	-	18,000
Total taxation	-	111,000

b) Deferred Income Tax Balances

The tax effects of temporary differences that give rise to deferred income tax assets and liabilities approximate the following:

21. INCOME TAXES (continued)

b) Deferred Income Tax Balances (continued)

Recognized deferred tax assets and liabilities

	2016 $	2015 $
Non-capital losses	-	5,000
Exploration and evaluation assets	-	(116,000)
Total	-	(111,000)

Unrecognized deferred tax assets

Deferred tax assets have not been recognized in respect of the following temporary differences:

	2016 $	2015 $
Non-capital loss carry-forwards – Canada	15,107,000	10,312,000
Non-capital loss carry-forwards – Peru	9,067,000	9,316,000
Capital losses	149,000	659,000
Share issue costs	29,000	53,000
Exploration and evaluation assets – Canada	8,322,000	8,469,000
Exploration and evaluation assets – Peru	723,000	2,629,000
Marketable securities	-	137,000
Other	131,000	114,000
	33,528,000	31,689,000

Deferred tax assets have not been recognized in respect of these items because it is not probable that future taxable profit will be available against which the Company can use the benefits.

c) Tax Loss Carry-Forwards

As at December 31, 2016, the Company had resource pools of approximately $8,322,000 in Canada and S/. 1,807,000 ($723,000) in Peru, which under certain circumstances, may be utilized to reduce taxable income of future years. The Company has approximately $15,107,000 of non-capital losses in Canada and approximately S./ 22,661,000 ($9,067,000) of non-capital losses in Peru, which can be used to reduce taxable income in future years. If not utilized, the non-capital losses in Canada and Peru will expire as follows:

Year of Expiry	Canada Amount $	Peru Amount S./	Peru Amount $
2017	-	122,000	49,000
2018	-	1,332,000	533,000
2019	-	1,247,000	499,000
2020	-	1,242,000	497,000
2026	147,000	-	-
2027	2,174,000	-	-
2028	463,000	-	-
2029	4,433,000	-	-
2030	1,008,000	-	-
2031	740,000	-	-
2032	1,593,000	-	-
2033	812,000	-	-
2034	1,604,000	-	-
2035	919,000	-	-
2036	1,214,000	-	-
Indefinite	-	18,718,000	7,489,000
	15,107,000	22,661,000	9,067,000

22. SUBSEQUENT EVENTS

On March 23, 2017 the Company sold the Don Pancho property to Tartisan Resources Corp. ("Tartisan") for cash consideration of $50,000 and 500,000 shares of Tartisan. Duran will also receive an additional 500,000 shares of Tartisan as certain Project milestones are achieved by Tartisan, and will retain a 2% Net Smelter Royalty ("NSR") in the Don Pancho Project of which half (1%) can be purchased by Tartisan for US$500,000.

On March 14, 2017 the Company entered into a letter of intent ("LOI") with Tartisan for the sale of the Ichuña property for cash consideration of $50,000 and 500,000 shares of Tartisan. Duran will also receive an additional 500,000 shares of Tartisan as certain Project milestones are achieved by Tartisan, and will retain a 2% NSR in the Ichuña Project of which half (1%) can be purchased by Tartisan for US$500,000. The companies intend to replace the LOI with a definitive agreement no later than May 17, 2017, following due diligence reviews by both parties.

In April 2017, the Company announced the acquisition of three gold-silver mineral concessions (Miton de Oro, Indio Inka and Pueblo de Oro) in Northern Peru through direct application with the Peruvian Ministry of Mines or by direct purchase. All concessions are 100% owned with no underlying royalties.

Subsequent December 31, 2016, a total of $100,000 in promissory notes payable were issued to certain officers and directors of the Company. The promissory notes are unsecured, payable on demand and bear interest at the rate of 18% per annum.

Subsequent to December 31, 2016, 157,142 stock options expired unexercised and 139,000 common share purchase warrants were exercised for proceeds of $20,850.
